

Lab Result # : **2021/24655 - 1**
Patient Name: MOHAMMAD SALEEM ALSHINDI

Date of Birth: 29/01/1988

Medical Record Number: MDTC / 00012794

Sex: M **Age:** 33 Y.

Phone No.: 70490537

Visit #: 10052382

Referring Physician: MDTC

Date of Collection: 29/04/2021 09:30 AM

Date of Reporting: 29/04/2021 02:13 PM

Molecular Biology

<u>Test</u>	<u>Results</u>	<u>Unit</u>	<u>Reference Range</u>	<u>Prior Results</u>
COVID-19 PCR				
Specimen	Nasopharyngeal swab			
Technique	RT - PCR - CFX96			
Result	Negative			
RdRP gene	Not Detected			
N gene	Not Detected			
E gene	Not Detected			

A negative result for this exam means that SARS-CoV-2 RNA was not present in the specimen above the detection threshold. A negative result does not exclude the possibility of COVID-19, especially early in the disease. If COVID-19 is still suspected, based on exposure history and other clinical parameters, retesting should be considered in accordance with the guidance of public health authorities. Studies have shown that COVID-19 virus is most susceptible to transmission through close personal contact. It is still unclear how the virus is exactly transmitted. Symptoms of the disease can appear 2-14 days after the exposure.
